

Activities for workcamp participants

3x what

Length: 15min

Main objective(s): final evaluation

Materials needed: handout with questions

Outline (step by step methodology):

This activity is best performed after an activity where you are defining learning outcomes.

Tell the participants they will be thinking about next steps on their learning journey as a follow up to this workcamp.

Divide handouts (see the next page) to participants with the following questions: What.... did you get out of the workcamp/workshop? So what.... what value does this has, what questions were raised? Now what?.... What can you do with this new competence?

You can ask participants to share responses in pairs and define 3 next steps together. Steps should be concrete and practical. What will you do as a result of this workcamp? How will you spread / develop the competences?

3 x WHAT

What....
did you get out of the workcamp/workshop?

So what....
What value does this have, what questions were raised?

Now what?....
What can you do with this new knowledge?
